“Chaplain Yusuf Hasan gave me the feeling that things were going to be okay when my son was undergoing treatment for cancer. Yusuf was right. I'll never forget that he was there for us at a very difficult time.”
HealthCare Chaplaincy Network (HCCN) is a nonprofit health care organization that helps people in distress from illness and suffering find comfort and meaning. We are a leader in providing compassionate spiritual care in hospitals, online, and elsewhere, for all—whoever they are, whatever they believe—and a catalyst for education and research.

PROFESSIONAL BOARD-CERTIFIED CHAPLAINS:

- are the spiritual care specialists on the health care team as doctors and nurses focus on caring for the body, and as more people recognize that whole-person care encompasses spirit, mind, and body.
- serve those who are ill, their loved ones and family caregivers, and other health care professionals who deal every day with the stress of illness and loss.
- are trained to help people to identify and draw upon their sources of spiritual strength—regardless of religion or beliefs. As one very experienced professional chaplain says:

  “In our encounters with people in distress, we walk into some dark places and help bring in light.”

Providing spiritual comfort~

CHaplainsOnHand™

THE FIRST-OF-ITS-KIND ONLINE SERVICE

ChaplainsOnHand™ is the first-ever professional quality online service to provide spiritual comfort for people who are seriously ill and their caregivers—whoever they are, whatever they believe, wherever they are. It includes ChatWithAChaplain, a feature that lets people in spiritual distress connect with a professional chaplain.

Visit www.chaplainsonhand.org

AN EDUCATIONAL LEADER

Students consistently praise our Clinical Pastoral Education program, which is accredited by the Association for Clinical Pastoral Education, for how well it trains them to provide compassionate spiritual care.

We’re an innovator in online continuing professional education. With the California State University Institute for Palliative Care, we created the first online continuing professional education course to prepare board certified chaplains for palliative care subspecialty certification, and new online resources are being developed.

We publish PlainViews®, the preeminent online professional journal for chaplains and other spiritual care providers.

A RESEARCH LEADER

We are making important advances into the evidence of the value of chaplaincy interventions. Recently the John Templeton Foundation awarded us a three-year, $3 million grant to select, manage and support six promising national research projects on chaplaincy care in palliative care settings.

Our annual Caring for the Human Spirit conference is the first large-scale effort to form an evidence base for spiritual care effectiveness in health care. It will drive the research agenda for years to come.

December 8, 2013—“In a health crisis, patients and families may turn to a member of the hospital staff who offers help beyond the physical aspects of medical treatment: the chaplain. (There is) a growing recognition of the role of spirituality in health care.”

Chaplain Sister Margaret Oettinger brings cheer to a patient at Hospital for Special Surgery
