Your Outpatients Need Spiritual Care, Too.

Cost-efficiently expand spiritual care outside and inside the hospital setting with one or more of these new technology-based tools from HealthCare Chaplaincy Network™

**On-Call Chaplaincy**
- Expand spiritual and emotional care to outpatients, stressed staff, and overnight inpatients
- Confidential, one-on-one conversations by phone, email or video call with a professional health care chaplain

**Spiritual Care WEBSITES**
- License these spiritual care websites with your institution’s brand: ChaplainsOnHand.org; CantBelieveIHaveCancer.org

**HCCN™**
- 10 easily accessible programs with information, inspiration and comfort
- Topics: Spiritual Issues; Emotional Care; Spiritual Care; Palliative and Hospice Care; Grief; Death and Dying; Inspirational Quotes; Prayers; Communication; Legal/Financial Planning

**Spiritual Care Connect**
- Help patients and family caregivers assess their spirituality and navigate painful feelings
- Provides spiritual exercises and other self-care strategies

People Want Spiritual Care Included in Their Health Care
- Patient visits by professional chaplains during the course of the hospital stay lead to increased scores on the patient satisfaction surveys HCAHPS and Press Ganey, and can have positive fiscal consequences.
- Research studies show that the majority of Americans say that spirituality, in some form, should be an important consideration in their health care. Yet 72 percent of patients in a study note their spiritual needs were minimally or not supported.
